Subject: Silverton/Gold King Mine PIO/CIC activities going forward

As I prepare to de-mob, I wanted to pass on some notes going forward.

*There is not much of a need of a full time PIO up in Silverton, as I have kept Cynthia Peterson aware of events up here. She is the CIC for the Upper Animas Mining District.

*There will be a need to keep coordinating with our Liaison Officer and JIC at the IC and the Comms truck/OSC/USCG at the mine site to schedule future site visits. One suggestion is to have a set time every two weeks for site visits where work could stop at the mine during that time.

*Steve Wharton and Cynthia Peterson will plan on attending the ARSG (Animas River Stakeholders Group) meeting on Tuesday 8/25. Cynthia is planning on arriving on 8/25

*There may be a need to have admin Support for Steve Way in Silverton via START contract. Luke Chavez and I have talked briefly on this. I will check in with Steve to think if this is necessary.

That's what I can think of now, please let me know if you have other questions or things I may have missed. Thanks
